Subject: Request for consultations regarding asthma definitions
Attachments: Asthma Section Definitions Table.docx

Mary and Gina,

Barbara and I would like to arrange for consultation with 2-3 experts in epidemiological studies of asthma to review and provide input into the decisions we have made regarding selection and interpretation of relevant studies in the formaldehyde assessment. We have prepared a table showing the definition used and prevalence found in each study (about 25 total); this is the core material that would be used in this consultation (see attached draft).

Questions we would ask:

Ex. 5 Deliberative Process (DP)

I think the time commitment would be 6-8 hours per consultant, including the talking time. I don't want them to back to look at the original studies (and I don't want the decisions to be influenced by whether the studies were "positive" or "negative").

Is there a contract in place (ICF? SRC?) through which we could set up this task? Thanks for your help

Glinda
